

IMEX-09 EVO - All in One Industrial steam and vacuum system.

The new IMEX-09EVO offers the maximum flexibility and portability.
The appliance can fit in any car trunk comfortably for quick mobile services.

Functions:

- Dry steam
- Detergent injection
- Steam and vacuum simultaneously
- Hydro-jet
- Wet & Dry vacuum cleaner

All these functions in one system thanks to the combination of the following 3 items:

- Main steam unit (IMEX-SC09).
- Wet & Dry vacuum unit (IMEX-VC09).
- Support kit (IMEX-SK09).

230Volts, 50/60Hz, 3500 Watts.

Advantages:

- Portability
- The appliance can be used by two people simultaneously: an operator can vacuum while the other can steam clean.
- Thanks to the special design support kit the 09EVO is the first industrial steam and vacuum system that allows separating the wet & dry unit from the main steam unit in order to use both appliances as stand alone units.
- 6 levels setting to adjust the detergent quantity.
- 6 levels setting to adjust the hydrojet water quantity.
- 5 liters water refilling tank placed internally with external visible access to immediately check the water level.
- 5 liters detergent tank placed externally and easy to remove for the refilling or exchange with another tank when it is necessary to use more than one solutions.
- IMEX-09EVO is equipped with 230 Volts socket to plug in the vacuum unit or other tools which do not exceed a maximum of 1200 Watts.

More than 50 different types of accessories are available for various steam cleaning applications.
